

Arbutus Garden Arts has been designing personalized gardens since 2000. We combine extensive plant knowledge with practical understanding of garden maintenance to create designs that exceed expectations.

We emphasize site suitable shrubs, trees and groundcovers while minimizing lawn area to reduce irrigation and fertilization needs.

All season interest is one of our design hallmarks.

We design gardens that will have color, texture, structure, bloom and scent to appreciate year 'round.

Most of our clients enjoy installing our designs themselves at their own pace.

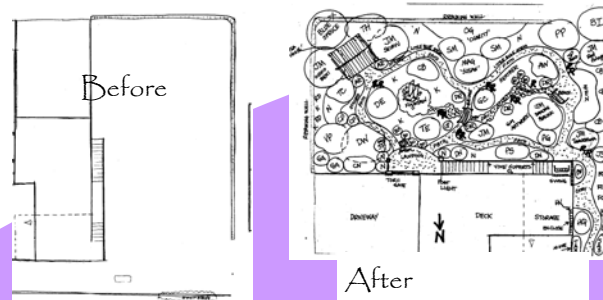

We look forward to helping you realize your garden desires.

Design Consultations

Our initial consultation fee covers an on-site visit (up to 2 hours) and a design packet that includes a written report discussion, descriptive plant lists, feature drawings (if applicable) and "before and after" maps.

The information we provide is suitable to guide professional landscape installers, if desired.

Asian Garden Design

Basic philosophy of Asian garden design

Serenity

Contemplation

Changing Perspectives

Illusions of Size and Space

Pacific NW/Asian fusion style gardens are a favorite motif. We can provide designs that range from classic to more eclectic Asian styles.

Water Storage System Design

In the Pacific Northwest, wet winters are followed by months without rain. A water storage system can even out the seasonal variations, providing collected rain water for irrigation during the dry months.

Our display garden is irrigated by a rainwater storage system.

We can provide innovative water storage system designs for your garden. Ask us about the possibilities.
